

## Subtraction

### Example:

$$63 - 21 = \square$$

**Step 1:** Break up the second number (21) into tens and units  $\longrightarrow 63 - 20 - 1$   
(Expanded notation)

(It is a minus sum so keep your minus sign)

**Step 2:** Subtract (minus) the first number and the tens (63 - 20)  $\longrightarrow 43 - 1$

**Step 3:** Subtract the two numbers together.  $= 42$
